PROFESSIONAL SUMMARY

Game Developer and Software Engineer with a B.S. in Game Development from Full Sail University and professional experience as a Junior Software Engineer at SAIC. Specialize in gameplay programming, AI systems, and scalable architecture using C++, C#, Unity, and Unreal Engine. Experienced instructor and team leader with a strong passion for building engaging game systems in collaborative indie and professional environments.

SKILLS

- Gameplay Programming, AI Systems, Game Architecture, Multi-threading
- Version Control: Git, GitHub, Perforce, TortoiseGit
- Engines & Tools: Unreal Engine 4 & 5, Unity, Roblox, GameMaker
- Project Management: Jira, Trello : Agile, Waterfall Development Methodologies
- Languages: C++, C#, Python
- Computer Science: Data Structures, Algorithms, Physics, Discrete Math

EXPERIENCE

Junior Software Engineer

January 2026 - July 2026

SAIC, Orlando, FL

- Integrated production-level software systems, contributed to a professional agile development environment of 6 individuals, and handled presentation of software and team support.
- Collaborated with 5 senior engineers to design, implement, and maintain scalable features.
- Undertook debugging, code reviews, and iterative development while adhering to internal standards and best practices, and participated in bi-weekly programming and tech challenges.

Gameplay Programmer

January 2026 - Present

PocketDino (Startup Indie Game Studio), Orlando, FL

- Assigned gameplay programmer, focused on guest AI systems and behavior logic for 6 guest types.
- Developed scalable gameplay features and scripts utilizing C++ code in Unreal Engine.
- Collaborated in a small indie team on core mechanics, architecture decisions, and long-term studio goals for both present and future games.

Unity And Robotics Instructor

May 2025 - August 2025

Full Sail Labs, Winter Park, FL

- Appointed Pilot (Lead Instructor) for Unity Game Development and STEAM Robotics camps, tutoring, managing classroom dynamics, and ensuring project completion for students ages 7-17.
- Facilitated daily lessons, project planning, code debugging, provided logistical support including setup and material preparation.

PROJECTS

Pixelcution - <https://kablr-productions.itch.io/pixelcution>

May 2024 - September 2024

- Lead Developer on a team of 5 to construct a Unreal 4.27 project in C++ on Perforce Repo.
- Completed weapon system, mechanics and particle FX for 4 unique weapons.

Devyn In Space - <https://theycansage.itch.io/devyn-in-space>

August 2023 - September 2023

- Lead a Team of 6 to create Devyn in Space, a FPS Wave Shooter using Unity 2022 with Github Version Control.
- Created 4 enemy types with different behaviors based on enemy type (Melee, Ranged, Swarm, Juggernaut).

EDUCATION

Bachelor of Science in Game Development (B.S.)

September 2024

Full Sail University, Winter Park, FL
